

Business Characteristics

Dental clinic diagnostic platform for automating insurance claims and administration with AI

1. Cloud-based dental clinic management system, dentall HiS

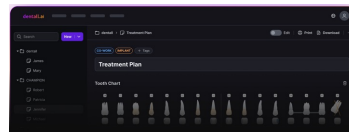

- Integrates ERP, CRM, and PMS to enhance the efficiency of diagnostic work through AI-driven image allocation

2. Cloud-based AI diagnostic support system utilizing AI, dentall AI

- AI generates dental charts based on input
- Provides diverse functions utilizing AI

Matching Needs

Ideal profile of Tokyo companies

- (1) New business development departments / CVC departments of major corporations (healthcare DX investment)
- (2) Dental system development and sales companies (technical integration partners)
- (3) Chain dental clinics / DSOs (proof of concept demonstrations)
- (4) Medical software device development companies (PMDA application support and joint development)
- (5) Medical trading companies (utilization of distribution network)

Objective

- (1) **AI technology integration**
Support for integrating AI features into existing dental systems
- (2) **PoC demonstration**
Promotion of demonstration projects in dental clinics
- (3) **Obtain PMDA certification**
Collaboration for approval of AI diagnostic systems
- (4) **Agency sales business**
Establishing distribution channels for Japanese dental products

Business Overview (Services/Products)

- Leverages AI technology developed as Taiwan's largest digital dental platform (with over 8,000 registered dentists) to offer dentall.ai, a generative AI assistant patented in Taiwan; an AI diagnostic support system; dentallHiS, a cloud-based clinic management system certified under ISO 27001 and 27701; a dental supply e-commerce platform; and specialized educational systems

■ dentall.ai

- Seamless workflow, improved time efficiency, and exceptional medical experience
- Provides AI treatment guidelines, AI CRM, AI operational analysis, and an AI chat function for insurance system support

AI治療ガイドライン
ワンクリックで治療計画、歯式チャート、持ち帰りヒントを生成

AI CRM
AIタグ、サマリー、予測で患者ケアを向上させ、手間を削減

AI運営分析
トレンドを把握し、KPIハイライトとデータ主導のアドバイスをスマートな判断を

AI システムサポート
24時間即時回答、音声認識、視覚ガイドで手間を削減し、顧客満足度を向上

保険チャット
厚い保険マニュアルから解放、専門家のように保険の質問に即座に回答

- We aim to integrate the dental AI technology we developed in Taiwan with Japan's outstanding healthcare system to collaborate on the creation of the next generation of dental DX. Would you like to build a partnership that leverages your company's existing business foundation to create new value with AI-driven diagnostic support and greater operational efficiency? We aim to build long-term cooperative relationships with an eye toward expansion into the Asian market.
