

Business Characteristics

1. Pioneer in generative AI services

Developed before ChatGPT became famous, it serves as a pioneering presence in the South Korean generative AI industry. It is possible to communicate with the AI as if having a conversation with a person. Recipient of the CES 2023 Innovation Award.

2. Constructed on advanced technology

It is built on various AI models from OpenAI, Claude, and Google and achieves high-quality content.

3. Overwhelming support from users

As Japan's largest AI character platform, characters from a wide range of genres are available. There are over 10,000 characters, and many users are creating their own characters daily.
